

Children's Board Family Resource Centers in Town 'N Country

Free Flu Shots

AROUND THE CENTER

Influenza (flu) is a contagious respiratory illness caused by influenza viruses. It can cause mild to severe illness, and at times can lead to death.

The flu is different from a cold. The flu usually comes on suddenly. People who have the flu often experience fever, chills, cough, sore throat, runny or stuffy nose, muscle or body aches, headaches, and fatigue. Some people may have vomiting and diarrhea, though this is more common in children than adults. Some people, such as senior citizens, young children, and people with certain health conditions, are at high risk for serious flu complications.

The best way to prevent the flu is by getting vaccinated each year with a flu shot.

Young adults are eligible for free flu shot if they are 18 years old or over and are enrolled in Medicaid or have no health insurance.

For people 18 years and older.

Date: November 14, 2017
